Subject: Re: Agreed Order

Would appreciate at least the courtesy of knowing what, if anything, IDEM has done to the draft in response to EPA's comments 7/31 and 8/23, and the opportunity to answer any questions or concerns IDEM may have about those comments, before a draft goes out to Arcelor. I don't believe EPA has been slowing down the process.

Subject: Agreed Order

In an effort to speed up this process, I propose send AM the proposed AO stamped Draft next week so they get something in front of them to start looking at with the understanding that a few things still need to be worked out. If not, the process will continue to drag out.
